Development of former landing ground at BREITENBACH near ZEITZ	Development	of	former	landing	ground	٤٠ti	BREITENBACH	near	ZEITZ
--	-------------	----	--------	---------	--------	------	-------------	------	-------

50X1-HUM

- 1. In the Staatforst ZEITZ, approximately 1 km. south-east of BREITENRACH, MR TS 948545, partial de-forestation and levelling is taking place.
- 2. Along the southern boundary of what appears to be a former landing ground, the trees are being cut back to a depth of approximately 500 to 600 m. As far as could be ascertained, the eastern extremity of this partially cleared area is in the fire-break between JAGEN 69/70, whilst the cestern extremity is the Jagdhornstr., adjoining JAGEN 77.
- 3. Mo German workmen are employed on the site, and there were no contractors signs, dumps of building equipment, nor a civilian domestic site. Russian engineering troops were frequently to be seen entering and leaving the area, and the perimeter of the site was patrolled by Russian sentries. Access to several of the roads leading into the area was controlled.
- 4. We rail spur has been laid down, and no heavy readways have been proposed into the cleared arm. A large battery of heavy concrets mixers has been set up on the eastern extremity of the clearing, but it was impossible to ascertain just that, and how fair, concreting had taken class.
- 5. At approximately MR 919546 there is a civilian requisitioned site occupied by Russian personnel from the construction unit employed on the project.

SECRET

50X1-HUM

6. Three large HOUND type helicopters with Soviet markings

were observed parked at approximately MR 943541

50X1-HUM

adjoining the cleared area.
